

Arkray Blood Ammonia Meter Pocketchem BA PA-4140

Why Choose?

The **PocketChem BA PA-4140** is a compact, handheld blood ammonia analyzer designed for fast, reliable testing anywhere. With minimal sample requirements and simple operation, it delivers immediate, actionable results for critical care, emergency diagnostics, and point-of-care applications.

- “Portable ammonia testing with results in minutes—anywhere, anytime.”
 - “Lightweight analyzer delivering fast, accurate ammonia readings at the bedside.”
 - “No pretreatment—just add sample and get reliable results instantly.”
 - “Designed for emergency and critical care ammonia testing.”
 - “Small sample volume, big diagnostic impact.”
 - “Handheld design with powerful, lab-quality performance.”
 - “Battery-powered ammonia testing for hospitals, clinics, and field use.”
 - “Simple workflow, precise results—perfect for urgent care teams.”
-

Unique Selling Points

- **Handheld & Ultra-Portable** device—ideal for bedside, field, and emergency testing.
 - **Fast Results** with accurate blood ammonia measurement in minutes.
 - **Low Sample Volume** requirement (20 µL whole blood) for easy patient handling.
 - **Battery or AC Powered** for use anywhere, anytime.
 - **No Pretreatment Needed**—uses ready-to-use reagent strips.
 - **Lightweight Design** (150 g) for maximum convenience and mobility.
 - **Separate Printer Unit Support** for instant hard-copy results.
 - **Simple 4-Step Workflow** for easy operation by any healthcare staff.
-

Clinical Benefits for Hospital Laboratories

- Supports rapid decision-making in liver failure, metabolic disorders, and critical care.
 - Reduces reliance on central lab for urgent ammonia testing.
 - Minimizes delays and improves patient triage during emergencies.
 - Ensures consistent performance with stable reagent strip technology.
-

Emergency Testing Performance

- Portable design enables immediate bedside testing.
 - Quick turnaround ensures rapid stabilization in critical liver and neuro cases.
 - Reliable readings even in time-sensitive situations.
-

Why Hospitals Choose

- Compact, user-friendly system for fast deployment.
 - Dependable accuracy for routine and STAT ammonia measurements.
 - Highly efficient for ER, ICU, NICU, and remote screening programs.
-

Transform Your Laboratory Today

Upgrade to the **PocketChem BA PA-4140** and bring fast, accurate ammonia testing directly to the point of care—improving workflow efficiency and clinical outcomes.
