

ARKRAY PocketChem HemoG (Handheld Hb Testing System)

Why Choose?

The **PocketChem HemoG** is a fast, handheld hemoglobin testing system designed for point-of-care accuracy. Built for clinics, hospitals, camps, and field screening, it delivers near-instant results with minimal sample volume and simple operation.

- “Get accurate Hb and HCT results in just seconds—anywhere.”
 - “Pocket-sized power: instant hemoglobin testing on the spot.”
 - “Fast, reliable anemia screening with only 7 μ L of blood.”
 - “Designed for mobility; trusted for clinical accuracy.”
 - “The handheld solution for rapid critical-care hemoglobin testing.”
 - “Compact, precise, and ready for point-of-care diagnostics.”
 - “Four steps, five seconds, highly accurate results.”
 - “Perfect for clinics, camps, and emergency care—test Hb instantly.”
-

Unique Selling Points

- **Ultra-Fast Results** in ~5 seconds for rapid patient assessment.
 - **Handheld & Portable** design for use anywhere—OPD, bedside, outreach camps, or emergency rooms.
 - **Small Sample Volume** (7 μ L) ideal for pediatric, geriatric, and difficult draws.
 - **Dual Results** – Measures **Hemoglobin (Hb)** and **Hematocrit (HCT)** simultaneously.
 - **Highly Accurate**, calibrated to clinical cell counters.
 - **Four-Step Simple Workflow** reduces operator error and increases testing efficiency.
 - **Professional-Grade Reliability** in a compact, pocket-sized device.
 - **Low Maintenance** with minimal consumables and easy handling.
-

Clinical Benefits for Hospital Laboratories

- Supports quick anemia screening and critical-care monitoring.
- Ideal for OPDs, ICUs, casualty, blood banks, and mobile screening units.
- Helps reduce patient waiting time with immediate point-of-care results.
- Enhances diagnostic efficiency without depending on large analyzers.

Emergency Testing Performance

- Delivers dependable readings in seconds—crucial for trauma, bleeding, pregnancy emergencies, and critical cases.
 - Portable format allows rapid bedside testing during codes or triage.
 - Accurate results support timely clinical decisions in urgent scenarios.
-

Why Hospitals Choose

- Proven accuracy aligned with standard hematology analyzers.
 - Simple, intuitive operation suitable for all skill levels.
 - Compact footprint saves space and increases mobility.
 - Reliable performance across clinical and field environments.
-

Transform Your Laboratory Today

Upgrade anemia screening, improve patient flow, and enhance point-of-care diagnostics with the **PocketChem HemoG**—a compact solution delivering laboratory-grade results in seconds.
