

Biomeriux BACT/ALERT 3D Microbiological Analyzer

Why Choose?

Choose the BACT/ALERT 3D Microbiological Analyzer for fast, reliable, and versatile microbial detection in every dimension of testing.

- Automated detection for every microbe.
 - All-in-one platform for bacteria, fungi, and mycobacteria.
 - Modular solutions for labs of any size.
 - Rapid reporting for urgent clinical needs.
 - Consistent quality, every test, every shift.
 - Streamlined workflow, maximum safety.
 - Expandable throughput for growing facilities.
 - Science-driven results, trusted worldwide.
-

Unique Selling Points

- **Automated Microbial Detection** - Delivers accuracy and rapid results with minimal manual handling.
 - **Comprehensive Detection** - Supports recovery of bacteria, fungi, and mycobacteria in one advanced analyzer.
 - **Compact & Modular** - Platform fits various lab sizes; adapts to changing needs with modular design.
 - **Scalable Throughput** - Available in BACT/ALERT 3D 120 or 240 configurations for tailored workflow.
 - **Reliable & Durable** - Robust technology ensures consistent quality, durability, and safety in every process.
-

Clinical Benefits for Hospital Laboratories

- **Accelerated Detection** - Faster microbial identification for improved infection control and patient care.
 - **Simplified Workflow** - Manage a wide range of specimens with ease; reduce complexity and maximize efficiency.
 - **Reduced Errors** - Automation minimizes human error, streamlining processes for busy labs.
-

Emergency Testing Performance

- **Rapid Reporting** - Timely results for urgent, critical clinical scenarios and outbreak management.
 - **Dependable Under Pressure** - Maintains high performance in high-demand or emergency cases.
-

Why Hospitals Choose

- **Trusted Modularity** - Preferred by top hospitals for flexible and scalable configuration.
 - **Expertise & Innovation** - Backed by bioMérieux's proven track record in microbiology.
 - **Seamless Integration** - Designed for easy lab setup and scalable expansion.
-

Transform Your Laboratory Today

Upgrade to BACT/ALERT 3D for comprehensive, automated, and robust microbiological analysis—empowering your team to deliver safer, faster results every day. Future-ready technology for hospital laboratories that value performance and peace of mind.
