

Biomeriux BMX MiniVidas

Immunoassay Systems

Why Choose?

The BMX MiniVidas (bioMérieux MINI VIDAS) is a compact, fully automated immunoassay system renowned for delivering fast, precise, and multiparametric results. Its advanced technology and easy workflow make it an ideal solution for both clinical and food safety laboratories needing efficiency and reliability.

- Rapid, reliable multiplex testing with minimal hands-on time.
 - Fits any lab—compact and robust with a global reputation.
 - Supports over 100 validated assays for broad diagnostic power.
 - Fast STAT access and emergency results for critical care.
 - Built-in automation and printing for seamless lab workflow.
 - Reduces contamination risk with single-use reagent kits.
 - 24/7 ready with quick startup and easy operation.
 - Trusted worldwide for proven accuracy and consistent uptime.
-

Unique Selling Points

- Fully automated "load-and-go" system for rapid processing and minimal manual intervention.
 - Multiparametric: Up to 36 tests per hour and more than 100 validated assay options, including key food pathogen detection.
 - Small footprint and robust, reliable build suitable for any laboratory size.
 - Built-in computer screen, printer, and uni-directional interface optimize workflow.
 - User-friendly interface with single-use, ready-to-go reagent kits.
-

Clinical Benefits for Hospital Laboratories

- Simultaneous testing of multiple parameters ensures fast diagnosis and supports diverse testing needs.
 - No inter-reagent or inter-sample contamination risk, ensuring true clinical accuracy.
 - Minimal hands-on time and quick daily startup free staff for urgent clinical work.
-

Emergency Testing Performance

- STAT-testing compatible: Priority sample processing for critical and emergency cases.
 - Fast result delivery for time-sensitive diagnoses, supporting better patient outcomes.
-

Why Hospitals Choose

- Recognized worldwide for reliability, flexibility, and ease-of-use.
- Integrated hardware and remote diagnostics minimize downtime and maintenance needs.
- Dedicated support and international validation provide confidence and trust in daily use.

Transform Your Laboratory Today

With BMX MiniVidas, transform your diagnostic capabilities by combining high-throughput efficiency, accuracy, and a scalable workflow to meet today's and tomorrow's clinical demands.
