

# Biomeriux BMX VITEK 2 COMPACT

## Automated microbial identification system

---

### Why Choose?

Choose the BMX VITEK 2 COMPACT to enable precise, rapid, and reliable microbial identification, backed by bioMerieux's legacy in diagnostics excellence.

- Automated accuracy that speeds up patient care.
  - Trusted by hospitals for rapid, reliable results.
  - Compact design, robust performance every day.
  - Reduces errors, enhances laboratory confidence.
  - Advanced infection control at your fingertips.
  - Seamless integration with your existing workflow.
  - Safety-minded by design, trusted for quality.
  - Engineered for durability; built for busy labs.
- 

### Unique Selling Points

- **Fast & Automated Results** - Delivers fast, automated results minimizing manual intervention for accuracy and speed.
  - **Seamless Data Management** - Integrates robust data management and reporting tools for seamless workflow.
  - **Built for Durability** - Engineered for long-term durability and consistent high performance in busy labs.
  - **Safety-Focused Design** - Safety-focused design lowers contamination risk and enhances operational reliability.
  - **Compact Footprint** - Compact footprint suits any laboratory layout, optimizing space without sacrificing functionality.
-

# Clinical Benefits for Hospital Laboratories

- **Faster Patient Outcomes** - Accelerates identification of pathogens, cutting turnaround time and improving patient outcomes.
  - **Reduced Errors & Workload** - Reduces technician workload and potential errors, boosting staff productivity and confidence.
  - **High-Volume Performance** - Maintains high accuracy even in high-volume, high-pressure environments.
- 

## Emergency Testing Performance

- **Critical Response Speed** - Responds quickly to critical infection control needs, ensuring timely decision-making in emergencies.
  - **Rapid Processing** - Streamlined workflow enables rapid sample processing, vital for urgent cases.
- 

## Why Hospitals Choose

- **Proven Track Record** - Proven reliability based on bioMerieux's longstanding expertise in microbial diagnostics.
  - **Easy Integration** - Easily fits into existing lab practices, supporting a smooth transition and staff training.
  - **Quality Assurance** - Trusted for compliance and quality in hospital accreditation standards.
- 

## Transform Your Laboratory Today

Empower your hospital laboratory with BMX VITEK 2 COMPACT's advanced technology — boosting diagnostic speed, reliability, and confidence for better patient care. Invest in a system that combines innovation with proven performance to support your team and improve clinical outcomes.
