

# Biomeriux BMX VITEK 2

## Automated microbial identification system

---

### Why Choose?

Choose BMX VITEK 2 to achieve rapid antimicrobial susceptibility results and superior workflow efficiency in your hospital laboratory.

- Accelerate AST results for faster therapy.
  - Integrated ID & AST for seamless workflow.
  - Reduce errors and boost lab confidence.
  - Global leader in automated susceptibility testing.
  - Rapid answers for urgent clinical needs.
  - Trusted performance, every shift, every run.
  - Compact design, adaptable to any lab.
  - Built for future-ready hospital diagnostics.
- 

### Unique Selling Points

- **Fastest AST Results** - Delivers the fastest routine AST results, guiding prompt and accurate therapy decisions.
  - **Fully-Integrated Workflow** - Features a fully-integrated identification and AST workflow for seamless sample processing.
  - **Unmatched Reliability** - Ensures unmatched reliability and consistency with every run, optimizing laboratory performance.
  - **Robust Safety Measures** - Designed with robust safety measures for operator and patient confidence.
  - **Scalable Design** - Compact and scalable, adapting to any lab environment without compromising quality.
-

# Clinical Benefits for Hospital Laboratories

- **Faster Therapy Decisions** - Shortens time-to-result, helping clinicians deliver targeted therapies sooner.
  - **Reduced Manual Workload** - Reduces manual workload, minimizing risks for handling errors and improving lab productivity.
  - **Infection Control Support** - Supports infection control with trusted reproducibility, critical in high-volume settings.
- 

## Emergency Testing Performance

- **Confident Results Under Pressure** - Provides confident, actionable results for critical and time-sensitive cases.
  - **Optimized Turnaround Time** - Optimizes turnaround for urgent care settings, contributing to better patient outcomes.
- 

## Why Hospitals Choose

- **Global Recognition** - Recognized globally for AST excellence and trusted by leading healthcare providers.
  - **Proven Expertise** - Incorporates bioMerieux's extensive expertise in clinical microbiology.
  - **Smooth Implementation** - Streamlined training and adoption, ensuring smooth implementation.
- 

## Transform Your Laboratory Today

Upgrade to BMX VITEK 2 for high-speed, integrated AST performance — improving diagnostics, workflow, and patient safety in your laboratory. Partner with a system designed for modern hospital demands and future-ready clinical excellence.
