

# Horiba Abx Micros Es60

## 3 Part Automatic Hematology Analyzer

### Why Choose?

The **ABX Micros ES60 3-Part Hematology Analyzer** delivers fast, accurate, and reliable CBC results with minimal technician effort. Designed for routine labs, it combines automation, precision, and simplicity to streamline hematology workflows.

- “Fast, reliable CBC testing for busy diagnostic labs.”
  - “Accurate 3-part hematology results with effortless automation.”
  - “Compact analyzer delivering high-quality routine hematology performance.”
  - “Built for precision, durability, and everyday lab efficiency.”
  - “Consistent results that support confident clinical care.”
  - “Streamlined workflow with minimal operator intervention.”
  - “High-performance hematology testing in a small footprint.”
  - “A dependable solution for accurate and routine blood analysis.”
- 

### Unique Selling Points

- **Fully automatic 3-part differential** for dependable routine hematology testing.
  - **High throughput** delivering consistent CBC results quickly and efficiently.
  - **Compact, space-saving design** ideal for small to medium laboratories.
  - **User-friendly interface** ensuring easy operation and minimal training.
  - **Stable reagent system** for uninterrupted and cost-efficient testing.
  - **Robust build quality** designed for long-term, dependable performance.
  - **Low maintenance requirement** with simplified daily operation.
  - **Accurate, consistent results** supporting confident clinical decisions.
- 

### Clinical Benefits for Hospital Laboratories

- Provides reliable CBC parameters essential for diagnosis and treatment monitoring.
  - Reduces human error through automated sample processing.
  - Supports continuous workflow with rapid result availability.
  - Enhances lab efficiency with minimal downtime and smooth operations.
-

## Emergency Testing Performance

- **Fast turnaround time** to support STAT and emergency cases.
  - Delivers precise results even during peak sample load.
  - Supports immediate clinical interventions with high result reliability.
- 

## Why Hospitals Choose

- Trusted accuracy for routine hematology testing.
  - Easy to operate, making it suitable for all levels of lab staff.
  - Durable system providing long service life with minimal issues.
  - Streamlined workflow for busy hospital and diagnostic laboratories.
- 

## Transform Your Laboratory Today

Upgrade to faster, simpler, and more reliable hematology testing with the **ABX Micros ES60**—a system built to deliver accuracy, efficiency, and confidence in every report.
