

Arkray COBIO S50

Automated Urine Sediment Analyser

Why Choose?

COBIO S50 delivers fast, accurate, and fully automated urine sediment analysis, making it ideal for modern hospital laboratories seeking efficiency, reliability, and safety.

- Fully automated urine analysis with unmatched precision.
 - Rapid processing for busy hospital laboratories.
 - User-friendly interface simplifies everyday lab tasks.
 - Advanced detection technology ensures accurate results.
 - Durable and reliable for long-term lab efficiency.
 - Safe, closed system minimizes biohazard risk.
 - Fast turnaround supports urgent clinical decisions.
 - Compact design fits seamlessly into any laboratory setup.
-

Unique Selling Points

- **Fully Automated Testing:** Minimal manual intervention for streamlined workflow.
 - **High Accuracy & Precision:** Advanced detection technology ensures reliable results.
 - **Rapid Analysis:** Fast processing for increased patient throughput.
 - **Intuitive Interface:** Easy operation and seamless data management.
 - **Durable & Low Maintenance:** Built for consistent long-term performance.
 - **Safety First:** Closed system reduces exposure to biohazardous samples.
 - **Compact & Space-Saving Design:** Perfect for labs of all sizes.
-

Clinical Benefits for Hospital Laboratories

- Consistent, reproducible results support confident clinical decisions.
 - Optimizes lab workflow and productivity.
 - Capable of analyzing a wide variety of urine samples accurately.
-

Emergency Testing Performance

- Rapid turnaround for urgent diagnostic needs.
 - Automated system reduces human error in high-pressure situations.
-

Why Hospitals Choose

- Trusted technology with proven reliability in diagnostic labs.
 - Low maintenance requirements improve operational efficiency.
 - Easy integration with LIS for seamless reporting.
-

Transform Your Laboratory Today

Elevate your lab's diagnostic capabilities with the COBIO S50—where speed, accuracy, and safety meet effortless automation.
