

# HORIBA H550

## Semi-Automatic Yumizen H550 Horiba Hematology Analyzer

### Why Choose?

The **Yumizen H550 Semi-Automated Hematology Analyzer** delivers accurate, reliable, and fast blood analysis for routine diagnostics. Designed for efficiency and ease-of-use, it supports clinical labs with consistent performance and dependable results.

- “Fast, accurate 5-part hematology results for everyday diagnostics.”
  - “Precision you can trust—built for dependable clinical performance.”
  - “Smart semi-automated system designed for easy, reliable operation.”
  - “Compact design with powerful diagnostic capability.”
  - “Reduce turnaround time with rapid, consistent CBC results.”
  - “Advanced detection technology for superior count accuracy.”
  - “Efficient, cost-effective hematology testing for any laboratory.”
  - “Confidence in every report with stable, reproducible results.”
- 

### Unique Selling Points

- **High-precision 5-part differential analysis** for reliable diagnostic insights.
  - **Semi-automated workflow** that improves operator control with minimal manual intervention.
  - **Stable, consistent results** powered by advanced detection technology.
  - **User-friendly interface** for simplified operation and reduced training time.
  - **Compact design** ideal for small to medium-size laboratories.
  - **Low reagent consumption** for cost-efficient daily operation.
  - **Built-in quality checks** ensuring dependable, error-free reporting.
- 

### Clinical Benefits for Hospital Laboratories

- Provides accurate CBC and differential counts essential for patient management.
  - Improves diagnostic confidence with stable, reproducible results.
  - Supports routine hematology workloads with ease.
  - Efficient workflow reduces turnaround time and boosts laboratory productivity.
-

## Emergency Testing Performance

- Delivers **rapid CBC results** critical for emergency and ICU cases.
  - Dependable performance even during peak testing hours.
  - Clear, fast reporting ensures timely clinical decisions when every second matters.
- 

## Why Hospitals Choose

- Trusted performance for routine and STAT hematology.
  - Easy maintenance with intuitive system alerts and cleaning features.
  - Robust build quality designed for long-term reliability.
  - Smooth operation ideal for labs with varied staff skill levels.
- 

## Transform Your Laboratory Today

Enhance your hematology workflow with the Yumizen H550—precise, efficient, and built to support reliable patient care in every test.
